- Fixing buggy and optimizing Virtual Account payment features via Xendit for Royal Olive Residence project that are already implemented. Reducing from 1 error per 3 transactions to zero

PORTFOLIO

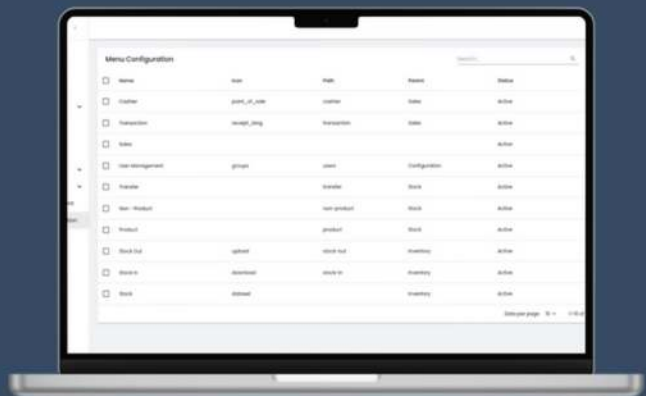

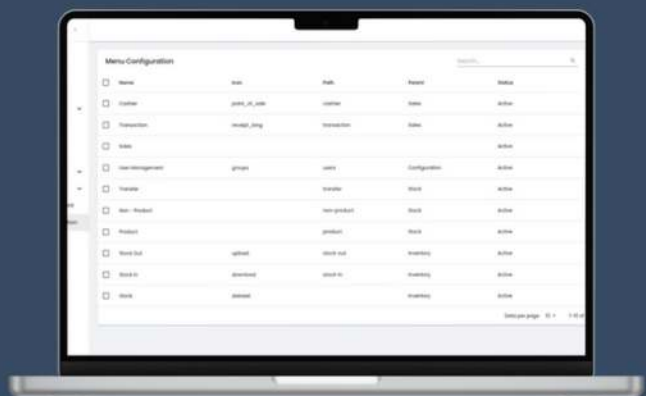

Toma-POS

A comprehensive point-of-sale system built for multi-branch retail businesses featuring an intuitive cashier interface with real-time inventory tracking, flexible payment processing, and thermal receipt printing. The system includes advanced features such as configurable charges (taxes, service fees), role-based access control with granular permissions, and branch-specific stock management with complete audit trails.

Tech Stack

- Typescript
- Next.js
- Material-UI
- Leaflet
- Zod
- Zustand
- JSON Web Token
- Prisma
- PostgreSQL
- Vercel
- Supabase

PORTFOLIO

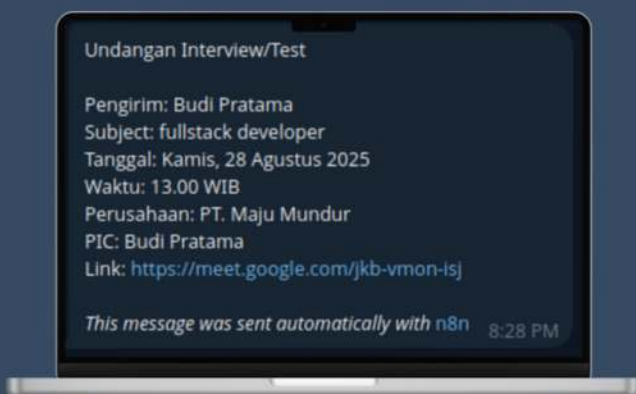

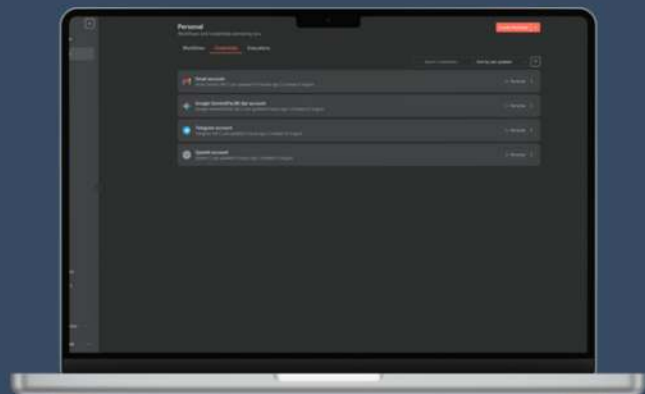

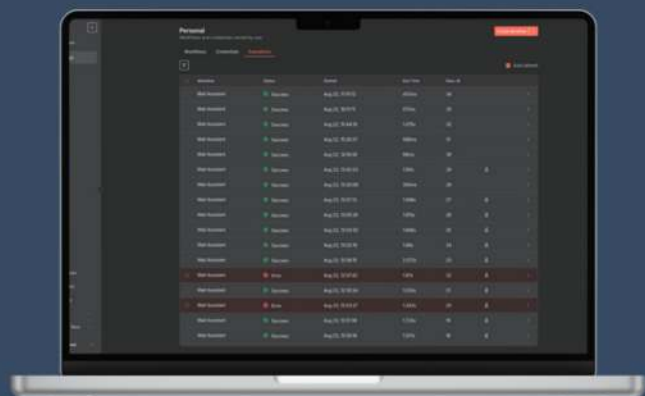

Mail Recruitment AI Assistant

Built a personal AI assistant on n8n. It analyzes incoming job emails for interview invitations and sends instant, organized notifications to a Telegram bot.

Tech Stack

- n8n
- Gmail API
- Telegram Bot
- Gemini AI
- Docker
- Cloudflare
- Nginx
- SSL
- Ubuntu
- VPS

Key Achievements & Future Vision.

- Increased efficiency by automating manual email screening.
- Future Scope: Developing this tool into a public service for job seekers via a Telegram bot with secure OAuth for Gmail access.
